

REMARKS

The specification has been amended to provide mention of reference number 6 in Figure

1. No new matter has been entered.

Claim 36 has been amended to address the objection raised by the Examiner.

Turning to the various art rejections, the Examiner takes the position that the asserted claims are not fully supported by the provisional application and as a result applies Murasko and/or JP '223 alone or in combination with other art to reject the claims as anticipated by or obvious from the art. Applicant does not agree with the Examiner. However, in order to expedite allowance, Applicant has amended independent claim 1 to limit the claim to a laminated electrical tape device, limit the substrate to a base sealing layer, and limit the electricity storage device to a battery, thus bringing the claims into conformity to the language used in the provisional filing. Applicant will be pursuing broader claims in a continuation application.

The several dependent claims have been amended, as necessary, to conform to changes made in independent claim 1. Claims 12 and 13 have been cancelled.

With the aforesaid amendments, it is believed the claims are fully supported by the provisional application, and both Murasko et al. and JP '223 are removed as citable prior art. Thus, no specific discussion of the art rejections is believed necessary.

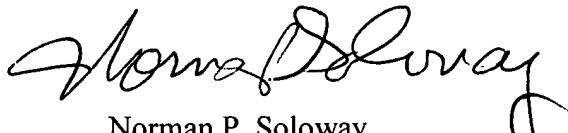

Having dealt with all the objections raised by the Examiner, the Application is believed to be in order for allowance.
